

Nota Bene:

[With all the emphasis put on the 'solar angel' by Bailey students, it should be pointed out that in human evolution, the solar angels give way to the "angel of the Presence" and to the ray of the (self-aware individualized spirit (EP2.39-44), the solar lords of the three higher kingdoms in nature. (Use of the term 'lunar lord' signifies that the lunar pitri has graduated through the lunar angel to become the lunar lord whose work is done and will be superceded.) In solar evolution these may be referred to as solar pitris in the council of the solar Logos, but this only suggests their function as fathers/parents ('pitri') to the evolution of sentient beings in much vaster systemic and extra-systemic cycles. In 'human' evolution in the 5th kingdom and beyond, the operant term is solar lord. It is all a matter of what human personalities and individuals identify with as their Prime. The theme of pervasive human Suffering comes precisely from identifying with one's envioning circumstances and taking an 'attitude', acquiescing to an identity borrowed from this karmic phenomenal environment and not taking the responsibility of actual thinking and inquiry into the nature of one's individualized identity (Ego in the causal body) and its essentially directional or forward-moving nature within an illusory environment of Self-generated circumstance (karmic continuum). Hence, the inevitable "Tests in Scorpio".]
